

**we are
Founders, Investors
and Managers**

**We hold consulting mandates with major
industry players and engage in active investments
in growth ventures
– to integrate the best of both worlds –**

CBR combines strategic consulting with entrepreneurship. We are mainly active in innovation and transformation environments and support young companies as co-founders or through direct investments. In addition to consulting mandates with medium-sized companies and large corporations, we also support our clients medium- to long-term as interim managers.

We believe in the combined value of consulting and entrepreneurship. We are striving to use the innovative power of organizations for the transformation of existing business areas and for the development of new business fields.

**WE ARE SEARCHING SENIOR PROJECT MANAGERS IN „LIFE SCIENCES & MEDTECH“
FOR
THE COMBINATION OF „HEALTHCARE & SUSTAINABILITY“**

"Life Sciences & MedTech" at CBR combines strategic management consulting in the healthcare sector with a strong focus on sustainability. We support companies across sectors to design their business models, products and services in a sustainable and profitable way at the same time.

We strive for accompanying partnerships with our clients and combine profound expert knowledge with implementation-oriented consulting.

We are looking for Senior Project Managers ...

- ... with relevant professional experience in an (international) corporate environment, NGO or Consultancy
- ... with profound expertise in the sustainability environment (e.g. ESG, Circular Economy, Green Hospital, Carbon Zero, etc.)
- ... with strong analytical and conceptual skills as well as professional project management skills
- ... with excellent communication skills and experience in leading project teams
- ... who are a native speaker/ fluent in German and English

„HEALTHCARE & SUSTAINABILITY“

In a customer and market environment characterized by innovation, enabling our clients to transform, digitize, innovate and adopt sustainable business approaches is the focus of our project work, including the following topics:

Operational Excellence & Consolidation

- Strategic and financial reorganization of scientific units and business areas
- Financial and structural consolidation (Cameraristic / Doppik, HGB, IFRS)
- Steering concepts and governance mechanisms, both in a public and industrial environment - incl. public research centers as well as SMEs and global MedTech and Life Sciences companies
- Establishment and refinement of scientific shared service centers

Sustainability & Business development

- Analysis and quantification of regulatory frameworks
- Market studies, including digitalization potentials MedTech 2030
- CO₂-neutral services/organization and CO₂ balances (Scope 1,2 and 3)
- Sustainable corporate governance based on ESG principles
- Circular Economy and Zero Waste for health care facilities (hospitals, clinics, rehabilitation centers, retirement homes, elderly care, etc.) and public research centers

Digitalization & Process Automation

- Introduction of digital tools for improved scientific resources management, e.g. shared equipment platforms, laboratory information systems
- Digital corporate process optimization and interface alignment (eFinance, eHuman Resources, and so on)
- Digitalization strategy and implementation roadmap (concept design and project management/implementation support)
- Systemic review with derived process realignment, e.g. of finance and innovation processes

Transformation & New Business

- Technology feasibility studies and project development
- Third party funding and grants management
- Technology project portfolio steering: Innovation through exnovation – Sorting-out the existing activities, prioritization & focusing
- Entrepreneurial and innovation hub management – from ideas and technology insourcing, acceleration and maturing towards spin-off and market proofs
